15 October 2026

UK POWER TRANSMISSION AND DISTRIBUTION INVESTOR EVENT

Balfour Beatty, the international infrastructure group, are today hosting institutional investors and analysts for a UK power transmission and distribution event, which will include a site visit to the Bramford to Twinstead Network Optimisation project being delivered for National Grid in Suffolk.

The event will include a presentation from Balfour Beatty Group Chief Executive Philip Hoare and senior leaders from Balfour Beatty's UK Power business, followed by a site tour of the project.

The presentation materials will be shared on www.balfourbeatty.com/investors/results-reports-and-presentations/ at 10am this morning. The presentation will also be filmed and shared on the website following the conclusion of the event.

No new material information or guidance will be disclosed.

Notes to editors:

- Balfour Beatty (www.balfourbeatty.com) is a leading international infrastructure group. We deliver the complex, critical infrastructure that keeps economies moving and communities connected.
- We finance, develop, build, maintain and operate essential infrastructure, combining deep engineering and construction expertise with long-term investment capability.
- For more than a century, we have shaped landmark infrastructure around the world. Today, our teams are delivering and managing major projects across our core markets, including operating and maintaining the M25 and its key arterial routes; helping to deliver Hinkley Point C, the UK's first new nuclear power station in a generation; expanding Rolls-Royce's Raynesway facilities in Derby to support the UK's submarine programme; and delivering Knox Street in Dallas, Texas, a major mixed-use development transforming one of the city's most vibrant neighbourhoods.
